Narrow Aisle Forklift Masts

The **N35-40ZRS/N30ZDRS and N35-45ZR/N30-35ZDR narrow aisle lift trucks** from Hyster provide two different operator positions: fore/aft and side. Also, the trucks come in various designs for cooler/freezer or subzero conditions. The AC reach truck product line offers a wide range of options including fork height display, fork camera, fork laser line, shelf height selector system and a load weight display.

The **R30XMS2 narrow aisle truck** has a spacious platform with anti-fatigue floor mat, fixed-hoop rails and a multi-function control handle. The truck also has operator amenities such as a flow-through ventilation wire mesh screen, storage pockets, removable trash bin and a cup holder.

The **V30-35ZMU narrow aisle truck's** AC traction, hoist and steering motors do not have any brushes. This translates to extended service intervals. The truck has an inbuilt system monitoring mechanism and also higher energy efficiency. The truck comes in five chassis choices, three operator compartment configurations. There is also a choice between 48-volt and 72-volt system available.
