Concrete Hoppers

The self-dumping hopper accessory can automatically trigger to both dump and release whenever the bumper release contacts the side of a dumpster. After dumping is completed, the hopper could go back to original locked and upright position. This piece of equipment is also accessible together with a cable which allows operation from the seat of the forklift so as to have the choice of manually unloading the hopper. There is a locking chain provided in order to lock the hopper to the tine truck. This product is constructed with consistent and reliable robotic welds for maximum strength. The forklift dumping hopper likewise has a blue powder coat finish so as to maintain durability.
